THIS DOCUMENT IS PART OF THE DEVICE

INSTALLATION

Please make sure that the delivered kit contains all the components,
i.e.:

- fireplace (casing)
- ETRONIC/ETRONIC BASIC burner
- glass with mountings

1. INSTALLATION IN A RECESS (in the wall):

1. Make sure the wall on or in which you are placing the device can support its weight.
2. Insert the fireplace frame into the prepared wall recess. The dimensions of the recess should be within a few millimeters so that the frame can be inserted.
3. Connect the cable to the mains. (230V)
4. Place the ETRONIC burner in the box and make sure it is level.
5. Place the glass in the glass holders.

Infire is not liable for any damage resulting from improper installation of the fireplace or from mounting the fireplace on an inappropriate wall/surface.
